

Complete Anatomy

# *Transform* learning with the new Complete Anatomy for Web

Would your institution benefit from innovative and easy to access anatomy tools?

Discover Complete Anatomy for Web, offering a solution that not only meets your curriculum needs but enhances your commitment to accessibility. By sharing simple links you can empower students to excel in anatomy.

## **Seamlessly connected**

Effortlessly connect to the world's most advanced 3D anatomy platform through browser-based access, enabling students to engage with the highest quality anatomical resources whether in-class or during self-directed study.

## **Accessible learning**

Designed with inclusivity in mind, the web platform meets the highest accessibility standards, ensuring that all students have equal opportunities to succeed in their learning journey.

# Complete Anatomy

## Complete Anatomy for Web: A *seamless upgrade* to your anatomy experience

### Key benefits

#### Easier access to powerful features

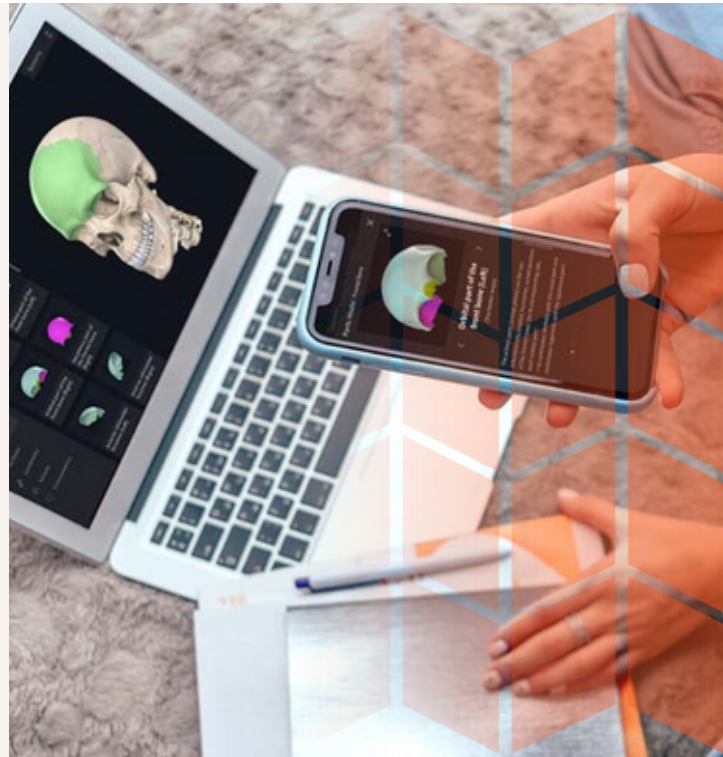

Our redesigned interface lets users easily discover high-value tools like Muscle Motion and Bone Parts. These features, loved by users, are now displayed intuitively, encouraging deeper engagement and more effective learning.

#### Reduced cognitive overload

A smarter interface delivers the learning content students need, when they need it.

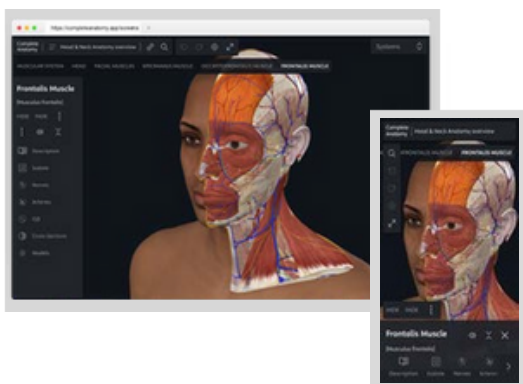

#### Unparalleled accessibility

Achieving a higher VPAT (Voluntary Product Accessibility Template) score, this platform is built to meet the highest accessibility standards.

### For students

Unlock the most useful anatomy tools — for example our award-winning 3D models which is fully dissectible. With no app downloads required, you can access educator-shared links on any device, ensuring a flexible and efficient study session every time.

### For educators

Streamline the educational experience and boost student engagement by easily sharing content. Post links into your syllabus, LMS, or lab manual to provide interactive learning on any device with internet access including a digital classroom podium.

### For librarians and administrators

With Complete Anatomy available on the web, improve student access to core resources while ensuring you meet the highest accessibility standards, strengthening renewal rates and satisfaction metrics.
