

When students feel in control of their learning, they're more likely to stay motivated and succeed both inside and outside the classroom. We've redesigned the Osmosis Study Schedule to provide the flexibility, accountability, and motivation learners need to succeed in critical exams.

**2 of 8**  
Your roadmap to success starts here - Let's make a study schedule just for you.

**What stage of the medical journey are you in?**

**Pre-clinical**  
Build a strong foundation with expert-designed study plans for medical licensing exams like the USMLE. Master key concepts and prepare for success in your pre-clinical years.

**Clinical**  
Take control of your study journey during clinical rotations. Customize your plan, adapt to real-world experiences, and stay on track at your own pace.

**6 of 8**  
Let's set aside some time to study.

We estimate 0 hours of study per week to cover the content. Adjust the daily hours below to fit your schedule.

Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
- 3 + hours	- 2.5 + hours	- 2.5 + hours	- 4 + hours	- 1 + hour	- 0 + hours	- 0 + hours

**Active Schedules: 2**

**Exam Schedule**  
Acutely ill patient

**Introduction** 23 mins

- 4 Questions (4 mins)
- Approach to shock: Clinical sciences (11 mins)

**Cardiogenic** 12 mins

- Acute coronary syndrome: Clinical sciences (11 mins)

**Study for today** Est. Time 4 mins Progress 67%

**Deadlines**  
Next end date is December 27th

**Overall Progress**  
3% of content covered  
On track  
You're ahead of pace and should reach your goal 3% ahead of schedule.

**Pre-study checklist**

- Grab a bottle of water
- Books and notes ready

Learners choose their study hours, resources, and topics to tailor their learning

Learners can create multiple schedules based on critical exams and individual learning goals

Learners can customize study sessions by adding their own items, articles, reminders, and more

Self-set deadlines balance progress and allow for flexibility

Clear task overviews keep learners on track

A pre-study checklist helps study sessions start with the right mindset and materials

Progress bars show achievements and time remaining, helping learners stay motivated

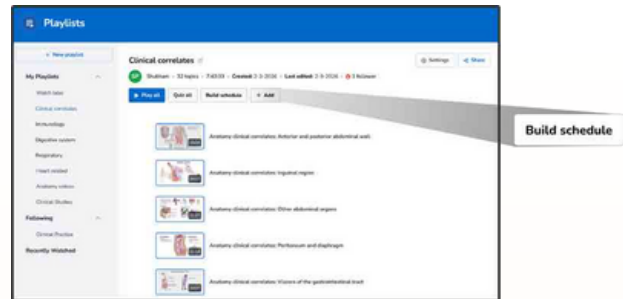

**Complete Anatomy**

Learners with a Complete Anatomy institutional account can also add 3D Models into their study schedules!

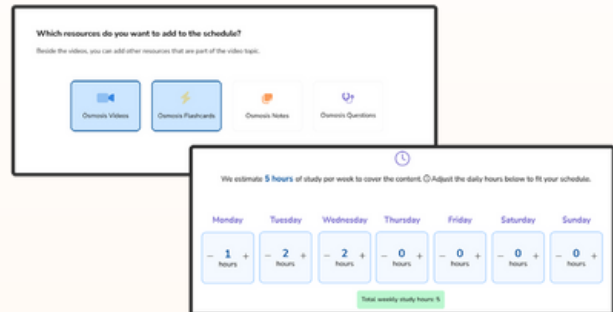

## Create and Assign Study Schedules from Your Playlists

Creating and sharing motivating, curriculum-aligned study plans with your students is easier than ever. You can create Study Schedules from your video Playlists and assign them directly to student cohorts or easily share via a unique link.

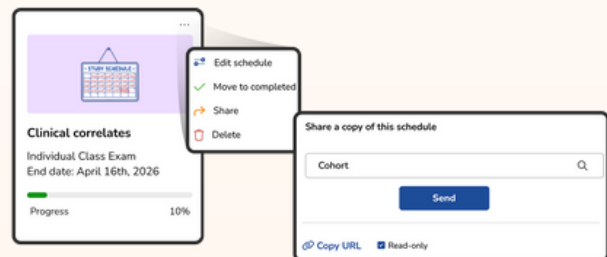

**1. Get Started:** In your existing Playlist, click “Build schedule” to create a Study Schedule from its content.

**2. Customize:** Follow the prompts to customize the Study Schedule content, completion date, hours of study per week, and more.

**3. Share:** Copy the Study Schedule link to share or assign the Study Schedule directly to selected cohorts in Osmosis.

From there, learners are notified in their account that a copy of a new Study Schedule has been shared with them. Once accepted, students can get started on the custom study plan right away. To help ensure set learning objectives are met, students cannot modify faculty-created Study Schedules.
